Spinnakur Instructions #SP1

To Cock: Rotate 1 1/4 - 1 1/2 Turns

Rotate the brass nose using thumb & forefinger while holding knurled portion of body with other hand.

For best results - when lock is picked in wrong position, rotate the plug back to the almost picked position - 11 or 1 o'clock. Then rotate the nose in the opposite direction in which the plug should rotate.

Insert blade portion of the tool into top of keyway & depress spinnakur button while holding the body still.

Do not allow hands to contact the nose while actuating. Never store in cocked position.
